

Jusegal

More than 30 years building a future together

Engineering, production and assembly
of metal structures and machinery for
the agri-food sector and industry

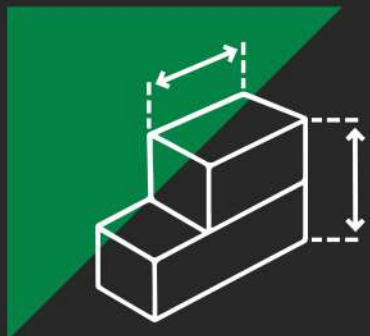

Our company

In 1990 Juan Galdeano decided to create the company JUSEGAL to provide maintenance and assembly services to agri-food companies in the area. With effort and dedication, the small family business has seen its business volume increase steadily and the small workshop located in the center of Binéfar (Huesca) has evolved into modern facilities with 60,000 m² and 10,000 m² covered.

The company has undergone an international evolution, reaching its installations throughout the national territory and countries in Latin America, Africa, Europe... It has become a reference in growth and development at a national level, also a leading company in its sector.

SERVICES

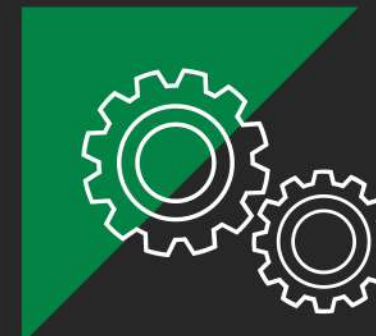

ENGINEERING AND
COMPREHENSIVE
PROCESS DESIGN

METAL BUILDINGS

CELLS AND TANKS

LIFTING AND
TRANSPORTATION
ELEMENTS

BOILER ROOM

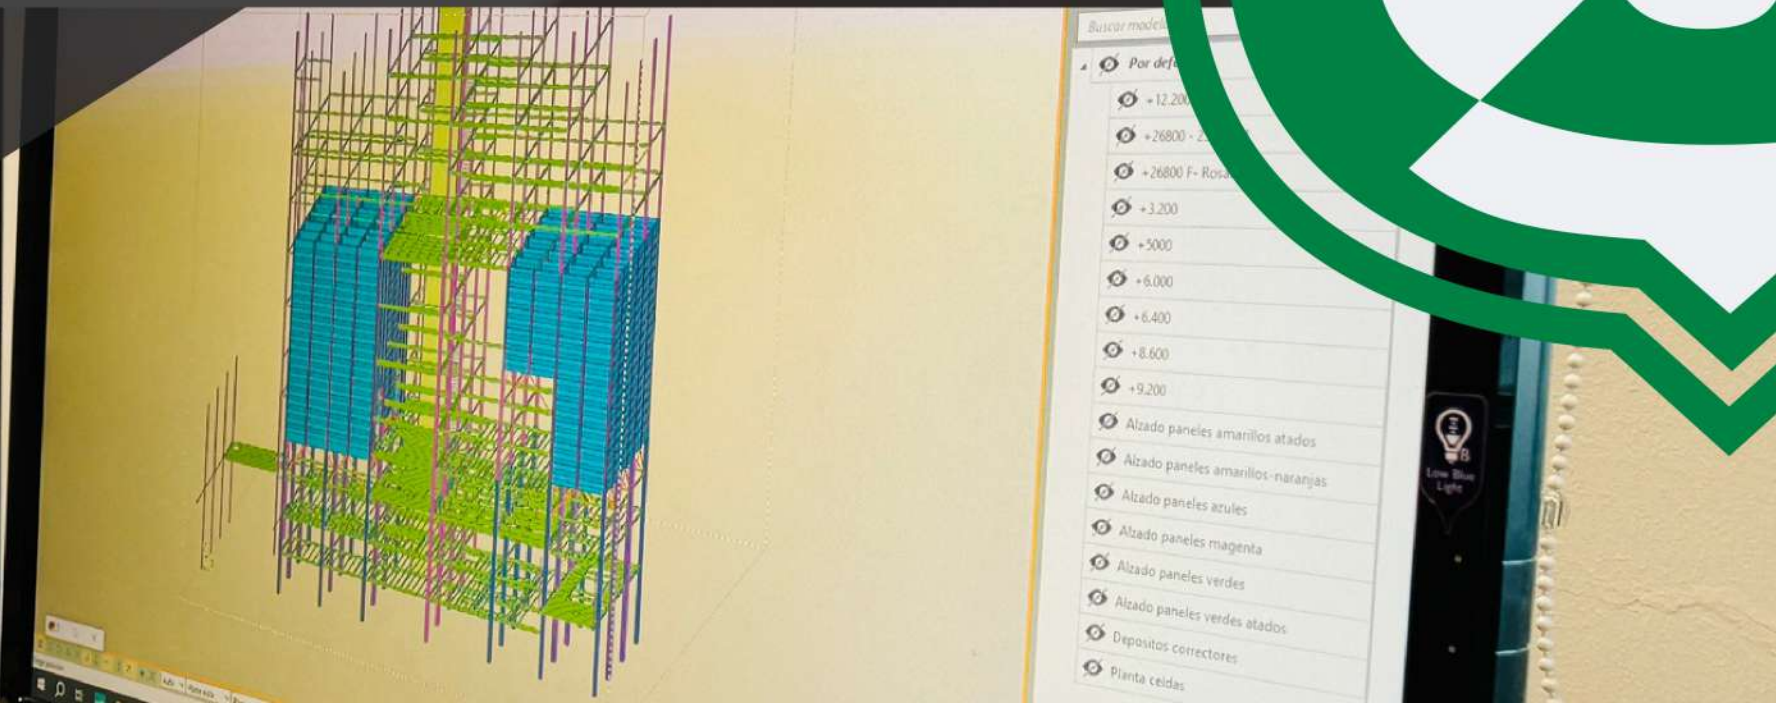

FEED FACTORIES

Our clients present their needs and our technical team turns them into reality, adapting to their needs, developing customized projects.

ENGINEERING AND COMPREHENSIVE PROCESS DESIGN

Construction of all types of buildings and metal structures for the agri-food sector or any other field. Our structures are bolted. Built with standardized metal profiles and shaped profiles. CE certified up to execution class EXC03 according to EN 1090-1 and 2.

METAL BUILDINGS

Depending on the type of product to be stored, we provide the most optimal solution, with our cells, caudrated, screwed or welded, and our round tanks.

CELLS AND TANKS

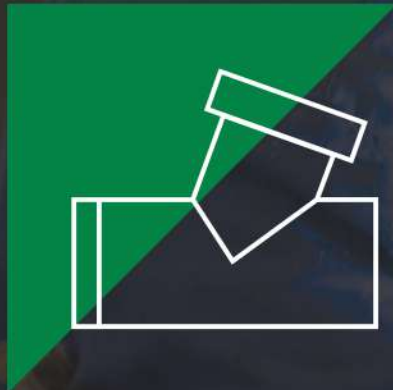

We manufacture transport and lifting elements up to 250Tn/h, looking for the best solution for the process for which they are intended.

LIFTING AND TRANSPORT ELEMENTS

Manufacture of all types of hoppers, ducts and metal constructions, both in iron and stainless steel.

BOILER ROOM

National leaders in the construction of factories for all types of feed: beef, pork, poultry, pet food, fish food, flour mills, any industrial agro-food process.

FEED FACTORIES

Our Method

One of the most important points in the company is our flexibility when developing projects.

We collaborate with leading national and international brands of agri-food machinery, implementing them in our processes and choosing them based on the requirements of our clients.

This means that our assembly and engineering team is used to working with all the leading international brands.
